## EDUCATION

### University of Waterloo

BSc. Life Science, Biomedical Sciences

WATERLOO, ON

SEPT. 2025 - PRESENT

## EXPERIENCE

### FOUNDER & PRESIDENT | ENDOCRINOLOGY UNDERGRADUATE STUDENTS ASSOCIATION (EUSA) |

University of Waterloo | ([instagram.com/@uw\\_eusa](https://www.instagram.com/@uw_eusa))

APRIL 2026 - PRESENT

- Founded and launched a student organization focusing on endocrinology.
- Developed the club constitution and recruited an executive team through outreach platforms including LinkedIn and Instagram.
- Planned endocrinology related academic events, workshops, and interactive activities throughout the term.

### OUTREACH INTERN | BioEng4Youth | Internationally Lead Organization

MARCH 2026 - PRESENT

- Support outreach initiatives across schools, nonprofits, and biomedical communities.
- Assist with sponsorship outreach, partnership development, and community service initiatives promoting healthcare education.
- Strengthened leadership, communication, and organizational skills while collaborating within an internationally focused team.

### CO-TEACHER | International Language Program (ILP)

SEPT. 2024 - PRESENT

- Assisted in teaching Gujarati to students in Grades 6 to 8 through classroom instruction and learning support.

### SOCCER COACH | Summer FC

JUNE 2024 – SEPT. 2024

- Coached children in soccer sessions focused on coordination, teamwork, and foundational athletic skills.
- Demonstrated leadership while planning drills, activities, and mini games alongside a co-coach.

## PROJECTS

### SLIMM: Student Led Innovations in Medical Micro-robots | University of Waterloo MARCH 2026 - PRESENT

- Continued research on TRUMF science fair project, with an advancement of adding micro-robots for rapid tissue regeneration.
- Contributed to biomedical research focused on microscale robotic systems for healthcare applications.
- Explored concepts related to targeted drug delivery and minimally invasive procedures through literature based research.
- Collaborated on concept development, experimental design, and research discussions within an academic team environment.

### TRUMF | Silver Medallion – Senior Life-Sciences Category, WWSEF

JAN. 2025 - PRESENT

- TRUMF: Tissue Regeneration Using Magnetic Fields
- Researched the use of iron oxide nanoparticles coated with bioactive molecules to support accelerated tissue regeneration and wound healing.
- Designed a theoretical magnetic targeting system intended to guide nanoparticles toward injured tissue sites for localized therapeutic delivery.
- Investigated applications of targeted drug delivery, regenerative medicine, and biomedical nanotechnology through scientific literature and experimentation.

## TECHNICAL & PROFESSIONAL SKILLS

**Microsoft Office Suite:** Microsoft Word, Excel, PowerPoint, Outlook, Teams

**Administrative Skills:** Scheduling, data entry, organization, email communication, record keeping

**Healthcare & Professional Skills:** Patient communication, teamwork, leadership, professionalism, confidentiality awareness, and problem solving

**Communication Skills:** Public speaking, mentoring, tutoring, customer service

**Certifications:** CPR C & First Aid Certification
